NATIVE LANGUAGES
100% Verified i18n Parity

THE END-TO-END OPERATIONAL PIPELINE

Edge Browser → Serverless Gateway → Single-Table Storage → War Room

TIER 1 • CLIENT

In-Game Mobile Capture

Governors snap their Rise of Kingdoms profile card, KvK spreadsheet, or combat gear screenshots directly on mobile or desktop.

Resolution Up to 4K
Format PNG / WebP / XLSX
Client React 19 Edge

TIER 2 • AI VISION

Multimodal Vision OCR

Gemini 3.1 Flash-Lite & WebGPU optical heuristics extract numeric ID, name, alliance tag, power, and KP in <600ms without brittle regex.

AI Model Gemini 3.1 Flash
Fallback WebGPU / Canvas
Throughput 20 RPM / 1.5K RPD

TIER 3 • EDGE ENGINE

ExcelJS & Auth Gateway

Next.js 16 App Router sanitizes inputs, verifies 8-digit PIN against salted hash, filters Heroscrolls tabs, and batches 60,000-row KvK workbooks.

Runtime Next.js 16 App Router
Engine ExcelJS 4.4.0
Auth NextAuth v5 (PIN / Discord)

TIER 4 • SOVEREIGN VAULT

AWS DynamoDB Core

Single-table design partition indexing historical scans (SCAN#kd#date), player profiles, migration history, and 90-day telemetry with auto-expiry TTL.

Table unity-core-production
Latency Single-Digit ms
Encryption AWS KMS at Rest

TIER 5 • COMMAND

War Room & Alert System

High Command analyzes KvK battle radar, deadweight polygraphs, and fraud anomalies. Critical alerts dispatch in parallel across Discord webhooks & Railway bot.

Alerts Multi-Channel SOS
Dispatch Discord Webhook / Bot
Clearance SuperAdmin / Leader

⚡ ZERO-COST SERVERLESS STANDARD

Eliminated cloud GPU hosting bills (\$400+/mo). All vision and thinking runs on Google AI Studio Free Tier and client device WebGPU.

🔒 ENTERPRISE SECURITY HARDENING

ExcelJS streaming prevents prototype pollution CVEs. Argon2/SHA256 salted PIN hashes protect governor accounts without requiring Discord OAuth.

🌐 UNIVERSAL GLOBAL PARITY

12 fully synchronized locales (en, ar, de, es, fr, id, ko, pt, ru, tr, vi, zh) verified by CI pre-commit parity gates.

HIGH COMMAND INTELLIGENCE MODULES

Multivariate Algorithmic Math & LLM Strategic Reasoning

EK POLYGRAPH

BEHAVIORAL AI

Audits 30-day ratios between power gains and kill points. Detects farm-trading, civil duelers, and deadweight who hoard power without fighting in war.

Metric: KP / Power DeltaRoute: /tools/polygraph

PLAYER HUNTER

CROSS-KD CENSUS

Searches 139,000+ historical player profiles across 163 kingdoms. Allows officers to vet migration applicants and view previous alliance loyalties.

Coverage: 163 KingdomsRoute: /tools/hunter

GHOST HUNTER

VITALITY ENGINE

Detects completely dormant accounts (zero power & zero KP delta over 7-60 days). Grades kingdom activity vitality (A through F) and quantifies deadweight weight.

Output: Vitality GradeRoute: /tools/ghost-hunter

ANOMALY & FRAUD MATRIX

LAB PROTOTYPE

Multivariate math classifying stat-padders (≥70% T1 farm duel kills), automated farm bots, deadweight whales (≥65M), and account buyer risks before KvK locks.

Cost: \$0.00 ServerlessRoute: /creator/lab/anomaly

BATTLE PREDICTOR 2.5

TACTICAL THINKING

Powered by Gemini 2.5 Flash Thinking. Compares up to 4 kingdoms head-to-head with radar charts, troop power density, T5 fighter ratios, and brutal odds verdicts.

Model: Gemini 2.5 FlashRoute: /creator/lab/battle

AI COMBAT COACH

GOVERNOR MENTOR

Personalized 1-on-1 performance coaching for every governor. Benchmarks personal deltas against power peers and dynamically adapts tone for peace vs war in 12 languages.

Locales: 12 LanguagesRoute: /stats (AI Coach)

AWS DYNAMODB PARTITION KEY (PK) & SORT KEY (SK) ARCHITECTURE

Table: unity-core-production

PK: SCAN#{kd}#{date}
SK: GOV#{governorId}
60,000+ governor nodes. Power, T1-T5, KP, Deaths, Tech, Building Power.

PK: DATES#{kd}
SK: DATE#{timestamp}
Chronological index of every scan snapshot. Powers delta comparisons.

PK: AUTH_GOVERNOR
SK: GOV#{governorId}
8-digit ID, Argon2/SHA256 salted PIN hash, Discord ID, SuperAdmin / Leader roles.

PK: EVENTS#{YYYY-MM-DD}
SK: EVENT#{ts}#{uuid}
Universal platform telemetry with 90-day automatic DynamoDB TTL expiry.
